

EXPLORING THE EXTRAORDINARY

7th Conference

Friday 4th – Sunday 6th December, 2015

York Marriott Hotel, Tadcaster Road, York, UK

CALL FOR PAPERS

Since its inception in 2007, members of Exploring the Extraordinary have organised six successful academic conferences that have brought together researchers from a variety of different disciplines and backgrounds. The purpose of these events has been to encourage a wider dissemination of knowledge and research, and an interdisciplinary discussion of extraordinary phenomena and experience. By 'extraordinary' we refer to phenomena and experiences that are considered to be beyond the mundane, referring to those that have been called supernatural, paranormal, mystical, transcendent, exceptional, spiritual, magical and/or religious, as well as the relevance of such for human culture.

We are looking for submissions for our seventh conference, and would like to invite presentation proposals on topics related to the above. Please submit a 300-500 word paper abstract to Dr Madeleine Castro and Dr Hannah Gilbert via ete.network@gmail.com by the 29th May, 2015. Accepted papers should be delivered on powerpoint, around 20 minutes in length, and intended for an interdisciplinary audience. Please include contact information and a brief biographical note.

We have a number of past conference presentations available to view via our website. For more information about Exploring the Extraordinary, and to see past conference information, abstracts, videos, etc. please go to <http://etenetwork.weebly.com> or email ete.network@gmail.com
